

Part 11. Equine Infectious Anemia.

§ 106-405.15. "Equine infectious anemia" defined.

Equine infectious anemia shall mean the disease wherein an animal is infected with the virus of equine infectious anemia, irrespective of the occurrence or absence of clinical signs of the disease. An animal shall be declared infected with equine infectious anemia if it is classified as a reactor to a serological test or other test approved by the State Veterinarian. (1973, c. 1198, s. 1.)
